WORK EXPERIENCE

Sales Operations & Tech Manager | WarriorBabe

Dec 2025 – Present

- Architected a full-scale **HubSpot Revenue Operations (RevOps)** system, implementing Setter, Closer, and Show Rate engines to automate high-ticket sales funnel tracking.
- Built a custom **Calendly-HubSpot sync patch** using **Node.js** and HubSpot Private Apps to map unique event URIs, ensuring 100% accuracy in meeting attribution.
- Engineered **Speed-to-Lead tracking** with custom office-hour logic and **Conditional Stage Properties (CSPs)** to provide real-time lead quality data for **Hyros** marketing optimization.

Software Engineer & QA Automation Engineer | Pyrashyut LLC

Jan 2024 - Jun 2026

- Architected Copilots (Travel Dating App) MVP** using **React Native (Expo)** and **Supabase**, featuring real-time chat, etc.
- Developed backend APIs and custom n8n/Make workflows** to automate business processes, reducing manual intervention by 80%.
- Designed automation workflows using **Clay** and **Airtable** to streamline data collection, reducing manual data entry by 70%.
- Optimized CI/CD pipelines** and automation on **AWS Ubuntu servers**, improving deployment efficiency by 90%

AI Automation Developer | NotreteK Solutions Inc.

Jul 2025 - Dec 2025

- Build, test, and maintain robust automation workflows using no-code/low-code tools (**n8n, Make**) and custom code (**JavaScript, Python**) to integrate **APIs** and **AI** services.
- Translate business requirements from stakeholders into efficient technical **automation solutions**, ensuring they are documented, scalable, and easy to manage.
- Troubleshoot, debug, and iterate on existing systems to improve performance and adapt to evolving client needs.

QA Engineer | DevsData

Jul 2024 - Jan 2025

- Conducted **in-depth QA** for backend functionalities across **Python** and **JavaScript** applications, reviewing code for **over 10 new features every month** and identifying issues early to ensure **100% reliable deployment across all platforms**.
- Developed and implemented **automated test scripts** for backend tasks, **reducing manual testing time by 80%** and enhancing accuracy and efficiency.
- collaborated with the development team on integrating tests into the existing **CI/CD pipeline**.

Software Developer | Blueberry Systems AI

Mar 2023 - Mar 2025

- Developed a RAG-based AI legal assistant using Pinecone and OpenAI, enabling users to query legal documents
- Built **RESTful APIs** handling real-time data operations, improving response times by 75%.
- Engineered scalable data pipelines and storage solutions using **PostgreSQL** and **MongoDB**, reducing data processing time by 55%.
- Integrated third-party APIs and external services (**OAuth2, payment processors**, AI models) with robust error handling and consistent interface design.

PROJECTS

Miraje — AI Virtual Try-On (React Native, Expo, Fashn.ai, Claude AI, Supabase):

- Building an **AI-powered virtual try-on** and wardrobe management app - users upload their photo + a garment image, and **Fashn.ai** generates a photorealistic composite in ~15 seconds.
- Integrated Claude AI (**Anthropic**) as an AI stylist for outfit suggestions from the user's digital wardrobe; built a Style Scout in-app browser enabling try-on directly from any shopping websites.

Epoch AI (React Native, Expo, TypeScript, Supabase, OpenAI GPT-4o, RevenueCat):

- Built a full-stack production **fitness app** for **iOS & Android** with real-time Supabase sync, 28+ DB tables with Row Level Security, and Supabase Edge Functions.
- Integrated OpenAI **GPT-4o AI coaching** with 20+ custom tools for nutrition planning, workout creation, and progress tracking; tier-based access with daily rate limiting and security audit completed.
- Shipped **RevenueCat** subscriptions, **E2E** encrypted social community (ECDH P-256 + AES-GCM), 10-language i18n, and a 25-tier muscle rank system; launching on App Store & Google Play.

HubSpot RevOps Automation (n8n, HubSpot API, Node.js, Calendly):

- Architected a full-scale **HubSpot Revenue Operations system** with Setter, Closer, and Show Rate engines to automate high-ticket sales funnel tracking for WarriorBabe.
- Built a custom **Calendly-HubSpot** sync patch using Node.js and HubSpot Private Apps, ensuring 100% meeting attribution accuracy; engineered Speed-to-Lead tracking with Hyros marketing integration.

Intelligent Gmail Organizer (N8N, OpenAI, Gmail API)

- Developed a hybrid workflow in **n8n** to automatically **categorize Gmail** messages using a **rule-based engine** and **AI**.
- Integrated **OpenAI's GPT-4o-mini** to classify ambiguous emails, including a feature for dynamically creating new Gmail labels based on **AI suggestions**.

SKILLS

- Programming Languages:** Python, JavaScript, TypeScript, Java, C
- Mobile & Web:** React Native, Expo, Next.js, React, Node.js, Django, FastAPI, Flask
- AI & APIs:** OpenAI API, Claude AI (Anthropic), Fashn.ai, LLM Integration, RAG, Prompt Engineering, Bland AI
- Databases:** PostgreSQL, MongoDB, Supabase, MySQL, MariaDB, SQLite
- Automation & CRM:** n8n, Make, Zapier, Pipedream, Clay, Airtable, HubSpot, Smartlead, Heyreach
- Cloud & DevOps:** AWS (EC2, Lambda, S3, Ubuntu), Docker, CI/CD (GitHub Actions), Git, GitHub, Vercel, Postman

EDUCATION

Bachelor in Computer Science | Kutaisi International University

2022 - 2026
